

Josh Fowler, AIA, NCARB

Josh is a Project Architect at Dewberry and a registered architect in the state of Illinois and Michigan.

Josh graduated with a Bachelor of Science: Architectural Studies from Southern Illinois University in 2013 and Master of Architecture from the same university in 2014. Since graduating he has worked with an architecture firm in the St. Louis metro east area as an architectural design professional working on several municipal and higher education projects as well as supplementary work in photography, graphics, and website consultation. He then moved on to work at the University of Michigan as an architectural designer associate

working on a variety of adaptive reuse and capital projects. Notable university projects include but are not limited to; the Flint Tower Renovation study, College of Engineering ZEUS Laser Lab, assisting with a multiple building lockset project, creating the seating plans and graphics for commencement ceremonies, and creating the new Accessibility Maps for the university.

Currently he is striving to become LEED and WELL accredited in order to fulfill personal aspirations and to become more well-rounded in his architectural career and promote environmental equity and justice.

Josh also has a great interest in the digital field of architecture as it pertains to the progression and influence on forms through such typologies as informed generative, kinetic, and parametric architecture. When not working, he loves to hone his photography and computer building/programing skills while also continually striving to become an at-home barista surrounded by his wife Andrea and two fur-babies Shelby and Bentley.
